

1800® Series Spray Heads and MPR Nozzles

RAIN BIRD®

Rain Bird® 1800 Series Spray Heads and MPR Nozzles are installed by more contractors than all other brands combined. This worry-free combination distributes water evenly, ensuring a consistently green lawn.

Application:

Smaller grassy areas around sidewalks and driveways; can also be used for watering flowerbeds or shrubs.

Outstanding Results:

- A wide selection of MPR nozzles is available so the distribution of water can be tailored to meet the unique and diverse needs of your landscape.
- MPR nozzles are designed to provide uniform coverage, ensuring that your lawn is green throughout, with no dry or brown spots.
- The wiper seal on 1800 Sprays significantly reduces the amount of water that may leak out when the sprinkler pops back down, saving you water and money.

Options:

- 4" 6" and 12" pop-up heights for varying grass or shrub heights.
- Seal-A-Matic (SAM) check valves, which prevents the pooling of water at the base of slopes or hillsides.
- Pressure Regulating Stem (PRS), which regulates pressure, eliminating misting or fogging at the head.
